Weekly Study Window Analysis

Discover your optimal study times for each day of the week based on historical performance data

Weekly Study Window Predictions

Next Best 4-Hour Study Window

22:00 - 02:00

Duration: 4 hours

Start: 2026-01-05 Today 10:00 PM
End: 2026-01-06 Today 12:00 AM
Confidence: 10.0%
Score: 1.375

Alternative Time Windows:

23:00 - 03:00	Score: 1.375
21:00 - 01:00	Score: 0.709
20:00 - 00:00	Score: 0.590

Based on 547 historical sessions
Current time: 2026-01-05 08:47 PM
Day: Monday

Cognitive Load Estimator (Python) UI

Real-time load state, EMA prompt handling, and hook status.

[Home](#)[Console](#)[Settings](#)

Stream issue

Stream disconnected. Ensure the estimator service is running at <http://127.0.0.1:8000> and network access is allowed.

COGNITIVE LOAD ESTIMATOR

Realtime telemetry for your workspace

offline

Observe estimator health, suppression causes, and respond to EMA without scrolling.

[Open console](#)[Settings](#)[Hop --](#)[Baseline --](#)[Pending none](#)

Local telemetry settings

Configure privacy pause, consent, and context-aware suppression rules.

[Home](#)[Console](#)

Failed to fetch

Capture permissions

Toggle telemetry capture and consent requirements. These changes apply immediately across the service.

[Enable privacy pause](#)[Revoke consent](#)

Privacy pause: off
Consent granted: yes

Context guard

Choose which detected workspaces or applications should pause EMA prompts automatically.

Blocking 0 contexts

Workspace contexts

0 observed

No context signals observed yet.

Running applications

0 detected

Start interacting with your workspace to populate this list.

[Add context](#)

Idle guard

Automatically pause prompts when no activity is detected for a custom duration.

Current threshold: 15 minutes

Idle duration

[Save idle guard](#)

Prompts will resume automatically after activity resumes or the idle guard timer expires.

ADAPTIVE SCHEDULER

Work/break scheduling

Intelligent scheduling powered by real-time cognitive load from praboth.

ADAPTIVE SCHEDULER

Real-time work/break scheduling

No Active Session
